A tiny device that bridges lifestyle with technology.

Features and Capabilities:

This device comes up with following capabilities:

- expanding the memory of connected smart gadgets
- access, synchronized and back of all files across connected devices.
- instant sharing of files
- remote download
- streaming seamlessly to any connected device
- blocking off ads
- creating secure wireless network making the accessed internet safer and more private
- recognizes your friends and family members through there smart wearables and smartphones, hence protecting against intruders and in all monitoring the home.
- creates smart recommendations by gathering data from multiple devices.

Based on the above feature, this device fits in the category of devices with monitor, control, optimization capabilities.

Under the hood:

Physical Components: Small Device having cylindrical casing with sleek aluminium finish, notification indicator.

> *Height*: 4inches
>
> *Width*: 1.2 inches
>
> *Weight*: 160 grams

Smart Components: Built-in chipset from RALIK, custom OS Linux,   HD video camera, VPN & TOR, Temperature sensor, Humidity Sensor, Motion Detector, cloud infrastructure with processing and analytical capabilities.

Connectivity: Cellular, Bluetooth, Wireless

Manufacturer: NUZii Laboratories
