

Wi-Fi Garden Sensor

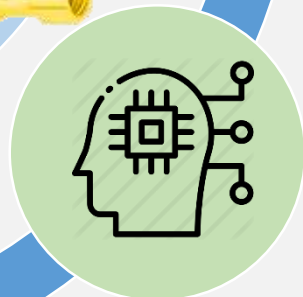

Smart Garden System by Edyn

Wifi-connected to the Edyn Cloud

Tracking of light, humidity, temperature, soil nutrition and moisture on your garden

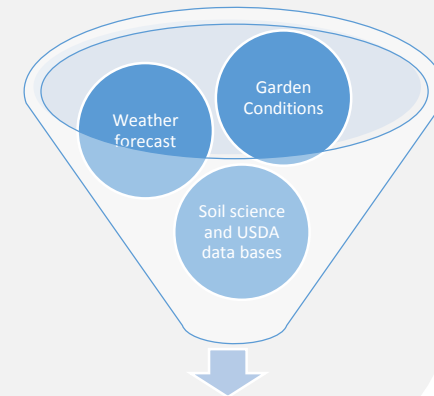

Machine learning on device and on the cloud

Continues monitoring of the condition of your garden.

Reduce water bills with a smartly control of your existing watering system *based on weather forecast and soil conditions.*

Front Garden app will give SMART recommendation based on Edyn **cloud analysis** of the garden data current conditions, public data like soil science data bases, farmer's almanac and USDA data to know **what's happening** and any given time.

Plants get what they NEED
