

Mimo Smart Baby Breathing & Activity Monitor

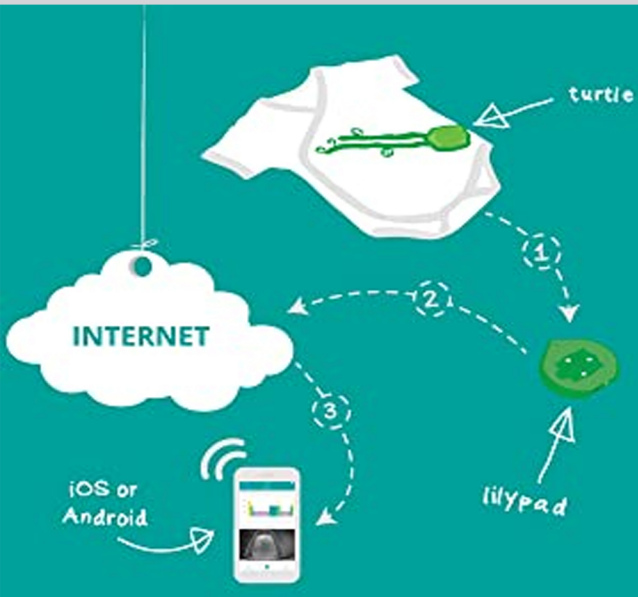

(Analysis by Helma Behbood)

SMART

- 3 machine washable cotton Mimo kimonos.
- Water-resistant Turtle (attaches to kimonos and uses bluetooth low energy).
- Lilypad base station.

Connectivity

Mimo uses proprietary, wearable, non-contact sensors to provide parents with real-time information. Using Bluetooth Low Energy in the Turtle, information is streamed to the Lilypad and up to the cloud, where Mimo processes all the data and sends it to a smartphone. The Mimo system can also detect pauses in breathing, if the baby rolls over, or the baby wakes up, as well as levels of sleep (REM vs non-REM), all with the goal of delivering better, more accurate information to parents.

The Abilities (monitor/control/optimize/automate)

Better sleep for everyone

Is the baby sleeping okay? Did they just roll over? Did they just wake up? Are they too warm? Maybe I'll just peek into the nursery and check to make sure? It's hard to resist checking in, and we know that wondering leads to lots of sleepless nights. With Mimo, you can check in on your baby's activity, whether you're in bed, downstairs, out to dinner, or at the office.

Breathing, body position, skin temp, and wake//sleep--all delivered right to your phone, anytime.

Physical options

Product Dimensions	11.3 x 2.6 x 7 inches
Item model number	00502
Batteries	1 Lithium ion batteries required. (included)
Batteries required	Yes
Battery life	120 Hours
Sensor technology	Room_temperature
Item Weight	1.3 pounds
