1)

The cloud trial contains the following:

thingworx foundation

Build Industrial IoT solutions using the ThingWorx low-code development environment.

Includes:
- Composer: low-code development environment
- Mashup Builder: drag and drop editor to create web & mobile GUIs
- Device Cloud Management
- Connectivity: SDKs, REST API, Protocol Adapters, Agents & gateways, Edge Micro Server (AlwaysOn)
- Asset Management & Remote Access
- Software Content Management
- Alert Management

thingworx analytics

Expand your solutions with powerful machine learning algorithms to analyze data, predict issues, and automate resolutions.

Includes:
- Predictive Modeling
- Explanatory Analytics
- Predictive & Prescriptive Scoring
- Digital Simulation
- Descriptive Analytics
- Property Transform

thingworx controls advisor

thingworx operator advisor

thingworx asset advisor

Understand and act on service issues before the issues cause significant disruptions in the business.

Includes the ability to:
- Gain real-time insight into your factory assets, and configure alerts for data communication errors to reduce the risk of losing critical production data and improve operational performance with Controls Advisor.
- Easily monitor and manage connected assets with quick access to live critical information such as asset health and status as well as historical asset data with Asset Advisor.
- Implement user friendly interface providing operators on the shop floor with direct access through an unified view to all the necessary data and information (like up-to-date digital work instructions) from various systems when needed reducing human error, increasing visibility and improving operations, productivity, efficiency, and overall product quality with Operator Advisor.

Access Free 30-day Hosted Trial

Supported Browsers:
- Windows MS Edge Chromium 81.0 and later
- Mac/Windows Firefox Quantum – 68 and later, ESR – 68 and later
- Mac/Windows Chrome 67 and later
